EDUCATION

- University Of Ottawa - Honors Bachelor in Computer Science** Sept. 2021 - Dec. 2023
• *Dean's Honors List, Scholarship worth \$7000 — GPA: 8.31/10* Ottawa, ON
- Sheridan College - Mechanical Engineering** Sept. 2016 - Aug. 2018
• *Scholarship worth \$4000 — GPA: 8.4/10* Brampton, ON

EXPERIENCE

- Farm Link Solutions - GrainFox** Jan 2024 - Current
• *Software Engineer* Ottawa, ON
 - Implemented **CI/CD practices** to automate data pipeline deployment and execution.
 - Utilized **Django ORM**, to write SQL queries for insertion of scraped data into the database for grain collectors.
 - Used **Docker** to set up **microservice** containers across diverse environments, including WSL, VM, while resolving version compatibility issues. Ensured smooth deployment, contributing to a modular and scalable architecture.
 - Created data pipelines for real-time pricing, by integrating **python web scrapping** scripts using **Selenium**.
 - Implemented custom Python retrievers and pre-processors leveraging **REST APIs** to streamline data gathering for our **unified data pipeline**. This process improved data quality for training our ML model.
 - Crafted Python scripts to gather, categorize articles, and integrated **ChatGPT API** to generate daily newsletters.
 - Implemented **Amazon S3** for scalable and secure object storage and **Amazon RDS** for relational databases.
 - Contributed to Scrum-based **Agile projects** through active participation in daily stand-ups and sprint reviews.
- GastroTrackAI** Sept 2023 - Dec 2023
• *Web Developer - Intern* Ottawa, ON
 - Developed the entire website's front-end using **React**, resulting in a savings of \$149/month from Wix subscription.
 - Using **typescript** and **Material UI**, customized the website theme for better user engagement.
 - Developed **Node.js** (SMTP protocol) for email communication from web users, driving up web traffic by 10%.
 - Enabled transfer of text and images between client and server using nodemailer, enhancing overall communication.
- BVGlazing Systems** Sept 2018 - Sept 2023
• *System Designer - Mechanical* Vaughan, ON
 - Designed, engineered and tested 5+ NAFS code-compliant window systems in **AutoCAD** and **Inventor**.
 - Engineered over 20 interactive 3D models using **VB.Net**, resulting in engaging user simulations.

PROJECTS

- Rate My Course**
 - A responsive **Django** web application, for students to rate and review over 10,000 uOttawa courses.
 - Integrated **Google Sign-in via OAuth2 API**, fostering user trust and simplifying login experience.
 - Engineered a search feature using **JavaScript**, allowing users to efficiently find relevant courses.
 - Improved data retrieval efficiency by 15% through **PostgreSQL's** optimized relational tables.
- JAVA Application for Subway**
 - Java-based** simulation program for a Subway sandwich shop, utilizing real-time data from 100 customers.
 - Using the data points, identified bottlenecks in the existing system and proposed 3 enhanced service delivery alternatives, reducing the overall wait time by more than 50% in each scenario.
- Course Booking Android Application**
 - Java-based application for universities with three user authentication profiles (Admin, Student, and Teacher).
 - Used **MySQL** and **CRUD** operations for db management. Implemented **OOP** concepts for modular code.

TECHNICAL SKILLS

- Programming Languages:** Python, Java, VB.Net, C++
- Web Development & Scripting:** HTML, CSS, Javascript (Node.js)
- Databases & Frameworks/ Libraries:** SQL, MySQL, PostgreSQL, React, Bootstrap, Django
- Development Tools:** Git, Docker, Bash, AWS, Jira, Selenium, Google OAuth2 API, PowerBI, Datadog, Airflow.
